You have 100 minutes to answer the following two questions:

1. Please look up around you and give a detailed description of what you see. Your (50%) aims should be to interest your readers with what you are seeing at this moment and also to help them visualize it. Try to be vivid and accurate (250 words).
2. Paragraphs #2 and #3 of the following selection are left unfinished. Please (50%) complete these two paragraphs in your own words. Use your imagination and write in an organized and logical way (300 words).

(#1) First let us postulate that the computer scientists succeed in developing intelligent machines that can do all things better than human beings can do them. In that case presumably all work will be done by vast, highly organized systems of machines and no human effort will be necessary. Either of two cases might occur. The machines might be permitted to make all of their own decisions without human oversight, or else human control over the machines might be retained.

(#2) If the machines are permitted to make all their own decisions, . . .

(#3) On the other hand it is possible that human control over the machines may be retained. . . .
